

Swine

Swine is defined as "All breeds of domestic porcine and all wild exotic porcine."

All swine require a permit from the Idaho State Department of Agriculture.

Psuedorabies: Please call our office for importation if swine originate from a state or area which is not stage IV or V.

All swine require a Certificate of Veterinary Inspection, on which they are individually identified, from the state of origin.

Idaho does not accept any swine who have been fed raw garbage or who have been vaccinated with any psuedorabies vaccine. A statement attesting to both must be recorded on the Certificate of Veterinary Inspection.

All breeding swine must have a negative Brucellosis test within 30 days of movement into Idaho, or originate from a Brucellosis free herd or Brucellosis free state.

Other Species

All Mink require an import permit and a negative Counterelectrophoresis (CEP) test for Aleutian Disease within 30 days prior to importation into Idaho.

Llamas, alpacas, and other camelid species need only a Certificate of Veterinary Inspection for importation into Idaho.

All fish and viable hatching eggs imported into Idaho require a Certificate of Veterinary Inspection, import permit, and an invoice or bill of lading that clearly describes the origin, species, inventory, lot number and destination of all fish in the shipment.

Equidae

Equidae is defined as "horses, ponies, asses, mules and zebras."

All equidae require a current Certificate of Veterinary Inspection. ISDA will accept the 6 month equine passport.

All equidae require a negative EIA test within 12 months before coming into Idaho.

All intact male equines 12 months and older require one of the following statements be recorded next to their name and description on their Certificate of Veterinary Inspection:

"Vaccinated for EVA"

"Seropositive Carrier of EVA"

"Seropositive Non-shedder of EVA"

"Unknown EVA Status"

Equine semen may be imported with one of these statements, regarding the stallion it came from, attached to the shipment.

Sheep and Goats

For questions regarding the importation of sheep and/or goats into Idaho, please contact the Idaho Sheep Commission at (208) 334-3115. If you are unable to reach the Sheep Commission for a permit, please contact the Idaho State Department of Agriculture at (208) 332-8540 or (208) 332-8560.

When sending animals from states with modified disease statuses, *always* call the department before they leave.

Animal Import and Export Requirements

Idaho has species-specific importation requirements. Please use the information provided in this brochure to provide basic requirements and answer any questions you may have. Always remember that *you are responsible for being in compliance with Idaho's import requirements* and you should always contact the Idaho State Department of Agriculture at (208) 332-8540 or (208) 332-8560 if there are any questions or you are unsure as to what is required for your specific situation.

The enclosed information is from our website. Links can be accessed through the Animals>Import & Export Requirements section of our website at www.agri.idaho.gov

If the animal species you want to import is not covered by the information here, please call the department. Someone will be able to assist you with any questions you have.

Cattle

Cattle are defined as "all bovidae including domestic bison."

All cattle require a CVI.

ID listed on the CVI is required for the following groups of cattle:

- Intact beef cattle entering an Idaho Approved Feedlot, 18 months and older.
- Intact male cattle (except rodeo bulls) to any other destination, 12 months and older.
- Intact dairy or female beef cattle going to any other destination, 4 months and older.

In addition to meeting all the requirements for beef cattle, all domestic bison require an entry permit.

Canadian cattle being imported must meet all requirements and have a permit and a CAN brand high on the right hip.

Unvaccinated female cattle may enter Idaho, by permit, if they are going to an approved feedlot or for exhibition.

All intact dairy cattle require an entry permit. All intact dairy cattle 6 months of age and older require a negative TB test within 60 days. Females over 4 months of age must be Brucellosis vaccinated.

All cattle used for rodeo or timed events need a negative Tuberculosis test within 12 months prior to importation into Idaho.

All bulls require an entry permit and either a negative Trichomoniasis test within the last 30 days or, if under 12 months, a virgin bull statement.

Beef breed females who are vaccinated for Brucellosis do not require a permit unless they are from a state that is not Brucellosis or Tuberculosis free, or they are less than 4 months of age and not accompanying their dam.

Birds

All birds imported into Idaho need a current Certificate of Veterinary Inspection (CVI).

All psittacine birds that are moving to Idaho for the purpose of commercial sale require an entry permit.

All poultry, ratites, and waterfowl must either originate from a certified NPIP flock and have a valid VS form 9-3 accompany them, or have negative tests for *Salmonella pullorum* typhoid, *Salmonella enteritidis*, *Mycoplasma synoviae*, and *Mycoplasma gallisepticum* within the past 30 days. When sending eggs, the parent test results must be recorded on the CVI.

All birds of species not covered here may be considered wildlife and/or exotic and covered by different rules.

Wildlife and Exotic Species

Wildlife is defined as "Any animal generally living in a state of nature except, domestic bison, domestic cervidae, domestic fur bearing animals, and fish." All wildlife and exotic animals require a current Certificate of Veterinary Inspection and a permit issued by ISDA.

Some animals are restricted or prohibited from importation under the "Rules Governing Deleterious Exotic Animals," IDAPA 02.04.27. If you currently own an animal that is listed in this rule, you need to complete a Deleterious Exotic Animal Possession Application and obtain a possession permit from the Department of Agriculture.

The Idaho Department of Fish and Game regulates wildlife and exotic animals, except Deleterious Exotic Animals, and should be contacted at (208) 454-7646 to find out their requirements and obtain a Wildlife Permit.

Cervidae

Domestic cervidae is defined as "elk, fallow deer and reindeer that are owned by a person."

** Importation of Domestic Cervidae requires pre-approval by the Idaho State Department of Agriculture, and animals may only go to locations approved by the department. **

All domestic cervidae imported into Idaho need a Certificate of Veterinary Inspection, on which they are individually identified, and permit.

All domestic cervidae must be treated, by an accredited veterinarian, with a parasiticide that is efficacious against giant liver flukes no less than 30 days and no more than 60 days prior to importation.

All domestic cervidae 6 months of age and older that do not originate from a Brucellosis certified free herd or Brucellosis class free state, need 2 negative Brucellosis tests within 30 days prior to entering Idaho.

All domestic cervidae must meet testing requirements for Tuberculosis.

All elk must be tested negative for red deer genetic factor, or be registered with the North American Elk Breeders Association (NAEBA).

All elk must originate from a CWD (Chronic Wasting Disease) certified free herd.

Dogs and Cats

All dogs and cats require a current Certificate of Veterinary Inspection. All dogs and cats 3 months (12 weeks) of age or older require Rabies vaccination.
